Darrin and Mindy,

Attached are my updated comments on the listing/ delisting reviews I completed. I modified the final section to provide some suggestions on how we might address the data issue. Take a look and see what you think. Let me know if you have any questions.

On another note, I am hoping to talk to HQs next week about the temperature methodology. I'll let you know what they say. One thing they asked me is about how DEQ plans to evaluate "human caused sources" in the second part of the temp assessment. From our conversation, it sounded to me like your approach relied solely on the degree change evaluation. But, since that wouldn't help you tease apart sources, and their significance, I wanted to make sure I was correct in my understanding.

That's all for now.
Tina
